LIFT CAPACITY

⚠ LIFT CAPACITY — DO NOT OVERLOAD

MY20 Wheel Loader · Pallet Fork 1070 mm

Rated Operating Capacity (kg) lift height \ load centre	200 mm	500 mm	900 mm
HIGH	T 1650	S 1370	R 1280
MID	W 1660	V 1550	U 1320
LOW	Z 1860	Y 1600	X 1310

Rated Operating Capacity = maximum load on FIRM, LEVEL ground — never exceed. R–Z = points on the diagram above.

Load centre (200 / 500 / 900 mm) = distance from the fork heel to the load's centre of gravity. Use the column matching your load; if it falls between, use the **larger** load centre (the smaller capacity).

These figures are for:
✓ firm & level ground ✓ standard tyres, pressure & ballast ✓ load even, not to one side
On rough, soft or sloping ground — or when turning — capacity is LESS. If unsure, use the lowest figure.

⚠ **IMPORTANT Never exceed the rated capacity — the machine will tip over.**
• trained operators only • carry the load LOW
• **NEVER travel with the load raised**
• never work across a slope • stay clear of raised loads
This chart is a guide — see the operator's manual, and always check the job site yourself.
